

SENCON

End Testing

We've got it covered

End Light Tester

Micro Leak Tester

Quality matters from end to end of your production line. At Sencon we've worked closely with ends manufacturers for over thirty years to develop inspection and measurement equipment covering key aspects of the process.

- ⊙ Our 100% on-press leak tester gives immediate feedback about production faults — options for upgrading to LED lighting arrays are now available.
- ⊙ Sencon's on or off-line sampling system for micro-leaks and hidden cracks incurs lower running costs and less downtime than comparable systems.
- ⊙ The End Progression Gauge delivers precise and repeatable three dimensional measurement of features, including score, to enable rapid and precise diagnosis of tooling issues and maximized tool life.
- ⊙ Sencon's double shell/missing tab detection, press protection system is specially designed for easy installation, minimal downtime and rapid maintenance.

Where quality matters, we've got it covered ...
